

Smart software components for digital print

The Mark Andy logo is displayed on a large white banner with red curved borders. The logo consists of a stylized red 'M' followed by the words 'MARK ANDY' in a bold, black, sans-serif font.

MARK ANDY

Helix's SmartDFE powers Mark Andy's state-of-the-art Digital Series HD HighSpeed 1200 press. The press sets a new industry standard, doubling the speed of its predecessors at 1200dpi resolution and establishing it as the fastest narrow web digital press in the marketplace.

HIGHEST SPEED AND QUALITY

Hybrid Software Helix develops smart software components used in the digital front ends and workflows that drive high-speed digital presses. Our technical capability and culture of working closely with our customers are just two of the reasons why we enjoy long-standing strategic relationships with manufacturers that include Durst, HP PageWide, HP Indigo, Mark Andy, Roland and Canon. We power the fastest and highest quality digital presses available. That's because we have a unique depth of expertise gained from working on digital presses for 40 years.

We're immensely proud to be honored with both a King's Award for Enterprise for Innovation in 2025 and a Queen's Award for Enterprise for Innovation in 2020, the most prestigious business awards in the UK.

REASONS TO CHOOSE HELIX:

1. We own 100% of our intellectual property and are not reliant on any third party
2. We are an independent publicly traded company with no OEM printer manufacturer ownership
3. We offer flexible components, empowering your engineers to differentiate your product
4. Our software is technically superior and performs faster than our competitors
5. The engagement model offered by our Technical Services team accelerates your time to market
6. We are innovators in high-speed digital printing
7. We are experts in overcoming the output quality challenges of high-speed inkjet printing
8. We have a flexible and open commercial model
9. We are easy to work with and have a partnership approach to development
10. We are part of Hybrid Software, the only company that can provide the full technology stack for digital printing

“Our relationship with Hybrid Software Helix is very important. We work closely with their team to fulfill our customers’ needs quickly. Support is also easy with the simple support package function within SmartDFE.”

Ankour Mour, Vice President and General Manager, FUJIFILM Integrated Inkjet Solutions.

TECHNICAL SERVICES WITH A DIFFERENCE

Our dedicated experts in RIP, screening and color technology are ready to guide you through the process of researching and choosing the right technology for you and implementing it successfully into your press.

Unlike other technical services groups, our aim is to accelerate your project to market so that you get to revenue quicker. We will accelerate your digital inkjet journey and work with you to support your business goals. We don't exist to generate revenue from consultancy, we're here to get you shipping with Helix technology.

We will help you to develop new components, prototype technologies in your environment and provide training and workshops.

The aim of the Technical Services team is to accelerate your product all the way over the finishing line. They can inject your project with the knowhow and energy that will help you succeed in record time.

A man with a beard and glasses, wearing a blue button-down shirt, is sitting at a desk in an office. He is wearing a black headset with a microphone and is holding the microphone with his right hand. He is looking down at a laptop screen. The background is a bright, out-of-focus office space with large windows.

“I’m seeing great results on this end as well. I sincerely appreciate the fast turn for a fix from the developers, and all the help you’ve offered too.”

Extract from a customer email to our support team.

YOUR SUCCESS IS OUR SUCCESS

When it comes to the quality and speed you need for digital printing, Helix has the right product set. It's been developed specifically to give optimum performance with special tuning for inkjet applications. We don't rely on any third parties for our technology and own all our intellectual property. When you choose Helix for your project you're in safe hands. Your success is our success.

OUR AWARD-WINNING TECHNOLOGY INCLUDES:

The only AI-accelerated Digital Front End for high-speed, single-pass digital presses.

The fastest RIP-independent screening engine.

The ultimate software development kit at the core of smart print applications.

The fastest RIP available, powering the next generation of digital printers.

“Receiving a King’s Award is an exceptional achievement, and it highlights just how far you’ve come with the development of SmartDFE. We’re proud to have this technology driving our Pico presses.”

Justin Nowell, Digital Director, Dantex Group

Hybrid Software Helix is a leading developer of smart software components for high-speed digital printing. Our technologies are designed to meet the most demanding printing applications from general commercial printing to labels and packaging and industrial inkjet applications, such as textiles, ceramics and décor. Through our various technologies for rendering, screening, and color management, we add value to solutions marketed by the world's leading brands, including HP, Canon, Roland, Durst, Mark Andy, Delphax and Kodak. Hybrid Software Helix is the OEM business unit of Hybrid Software. It is an independent publicly traded company with no OEM printer manufacturer ownership. Hybrid Software Group is listed on Euronext (HYSG).
